PROFESSIONAL SUMMARY

Frontend AI Engineer with proven experience developing responsive, data-driven web applications using **React.js, Next.js, TypeScript**, and **Tailwind CSS**. Specialized in connecting reactive client-side interfaces to **Generative AI endpoints, LLM APIs**, and **RESTful backend services**. Currently building client-facing AI web tools as an intern at **FlyRank AI** while pursuing a BS in Data Science & Applications at **IIT Madras**.

WORK EXPERIENCE

Front-End AI Engineering Intern | Internship

Jun 2026 - Present

FlyRank AI

Remote • Chicago, Illinois, USA

- Built responsive, component-driven web interfaces using **React.js, TypeScript, Next.js, and Tailwind CSS** to deliver automated SEO and growth tools.
- Integrated dynamic **LLM APIs, streaming Generative AI endpoints, and REST APIs** into reactive frontend state workflows for real-time user experiences
- Designed intuitive UI dashboards that translate complex backend machine learning data into actionable client interfaces.
- Managed client-side state and optimized component lifecycles to boost web application performance and minimize load latency.

Technologies / Skills Used : React, Node.js, Express, MongoDB, MERN, Object-Oriented Design, Operating Systems, Algorithms, Data Structures, complexity analysis

PROJECTS

Smart Parking System With Online Reservation

Mar 2024 - May 2024

Self Project

- Built an end-to-end IoT parking reservation solution using **MERN stack** (React, Node.js, Express, MongoDB) integrated with **Arduino (ESP8266 Wi-Fi)**.
- Designed client-server API communication protocols for real-time parking slot state updates and remote space allocation via **Firebase**.

Technologies / Tools Used : Arduino, Embedded C (Arduino IDE), ESP8266 Wi-Fi, MERN, Firebase, IoT Communication, Sensor Integration, Client-Server Communication

Farewell RSVP Website | 🌐 Github 🌐 Website

Lead Developer

- Developed and deployed an interactive, responsive event web application utilizing **HTML5, CSS3, JavaScript (ES6+)**, and **Firebase** backend.
- Engineered dynamic frontend UI features including a live interactive guestbook, RSVP state tracking, animated visual effects, and countdown timers.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Render, Cron-job, Firebase, Tailwind CSS
